Tech Talent South,  
Code immersion  
Raleigh NC, 2020

Central Piedmont  
Community Col,  
Automotive Systems  
Technology Charlotte  
NC, 2011-2013

East Carolina University  
Mechanical Engineering  
Greenville NC, 2008-  
2011

Problem solving and puzzles in the workplace that require me to broaden my knowledge and push me to new technologies. My current career brings new challenges every day with every vehicle. Building my thought processes and techniques to adapt and overcome, translating these skills directly into coding and developing has become a common practice and driving force behind the sites and programs I build.

### Projects

<https://github.com/jtodd0515>

#### Portfolio-<https://jamestodd.netlify.app/>

React.js • HTML • CSS

This portfolio site was built with React app. It showcases some of my projects completed. I individualized components with its own CSS to create a clean and professional code.

#### Bus routes App

Ruby • Javascript • Bootstrap • SCSS • jQuery

Boot camp app built with Ruby to determine location of buses in the Atlanta Ga area.

#### JournalME App

Node • Express • React

This App is a journaling app built for deployment on IOS and Android. It uses AWS for database to hold user journal entries on a mobile platform.

### Work Experience

#### Flow Mini of Raleigh

2017-Present

Automotive Technician

- Diagnose Automotive Mechanical and Electrical Systems
